

WILHELMINA TO TAKE THE BULLETIN PARTY

Will Return By The Same Boat
Leaving San Francisco August 31st

THE HOTEL MANX—SAN FRANCISCO.

The Wilhelmina, the pride of the Matson Fleet, the new steamship recently built and placed on the Honolulu-Hilo run, is the ship that will take the Bulletin Contest Party to California. The party will leave here on July 20th, the bookings having already been attended to which assures the members of the party of good staterooms, and the name of the ship itself is assurance of an enjoyable voyage.

The party will have many acquaintances aboard the vessel on this trip as the vessel will carry to full passenger capacity and most of those who have booked for this trip are island residents leaving for summer vacation. The six days' sea voyage should prove very pleasant, as the Wilhelmina has a large social room and promenade decks.

To Stop at Manx.

Upon arrival at San Francisco the party will put up at the Hotel Manx where plans are even now being made for their reception and entertainment when they reach there. The Manx management was particularly pleased to receive the commission for housing this party as they are very anxious to increase their island patronage, which has had such a steady growth during the past year, and especially since Albert Arrol the assistant manager was here in the spring. Mr. Arrol in a recent letter stated that he was going east for a short vacation but that he would be back in San Francisco before the Bulletin Party arrived there. In fact he stated that he was taking his vacation early this year in order to be sure of being at the Manx when the party reached there. Continuing he said:

"Even though I do say it, I believe I can arrange more pleasant side trips for the party than any one connected with the hotel. I promised you to make these arrangements and I want to attend to the matter personally. In addition to this is my hope that the party will contain some of my Honolulu friends. You can rest assured that anything that can be done to advance the enjoyment of the party while in San Francisco will be arranged. As to the hotel—it is getting a great deal of island patronage now and our guests always express themselves as satisfied with our accommodations."

Week Following Yosemite.

According to the plans now made the Bulletin Party will stop in San Francisco the first week after arrival there. During this week side trips will be made to the state university, Mt. Tamalpais, and the mint. In addition a thorough tour of the city will be made which will take the rest of the week. At the end of that week the party will start for Yosemite Park where five entire days will be spent in viewing scenic wonders. Returning from these excursions will be made to other parts of the State and another week will be spent in San Francisco.

Return Voyage.

The Bulletin Party will leave California by the Wilhelmina which sails from there on August 31st. This homeward trip promises to be a mer-

ry one. It was with difficulty that passage could be reserved for this boat as it is at the time when all the school teachers are returning to the islands in order to take up their fall terms of school, but the tour man was insistent and the bookings were made for this steamer. There might be a number of school teachers in the Bulletin Party and the Bulletin management wanted to be able to assure all candidates who are teachers that they could get back in time to take up their schools at the beginning of their terms.

Can Go Single Or in Groups.

It was necessary of course to make these arrangements in advance of the close of the contest and without consulting those who will constitute the party as it is impossible to know who the party members will be until after May 28th. In case one or more of the ladies cannot make the trip at the time the arrangements call for, provision has been made so they can go at an earlier or later date. But this year it is going to be advisable for all the party to go at the same time as much more entertainment can be provided when they are traveling together. In case some lady is elected as chaperone who cannot accompany the main body of the party, the trip can be transferred by the winner to some one who will be acceptable as a chaperone. But there is little probability of this being the case as most of the contestants have arranged ahead to take the trip when the rest of the party goes.

THE COMET'S TAIL

If Mr. Halley's comet's tail Should hit Hawaii a smash 'Twould settle many questions That now seem awful rash. 'Twould knock the Russians silly 'Twould capture Andy Grace 'Twould forestall Mr. Woolley And many things efface. Nuanu dam'd go finey And so would prohibition In fact, things would assume A terrible condition. For Kapa land exchanges We wouldn't care a bun With homestead water rights We'd surely all be done. I wish they'd change the comet To some remote date For to know, I'm very anxious Who's to be the delegate. Oh, it is something awful Conditions that here prevail But if I had my choice I'd say Send on the comet's tail.

—M. F. C.

When Baby was sick, we gave her Castoria.
When she was a Child, she cried for Castoria.
When she became Miss, she clung to Castoria.
When she had Children, she gave them Castoria.

THAT REMINDS ME

That we are going to vote on "Wet" or "Dry" for Honolulu in a WET OR couple of months. It is going to be a peculiar state of affairs; a condition never before experienced here. There will be no "third party" in the field. The noise will all be on one side. The champion or prohibitionist will shout "Vote for prohibition! Vote for prohibition! Down the demon Rum!" Well, that's all right. That's a part of his business. He thinks he is working in a good cause and is not ashamed to shout his stock in trade. There will be no noise from the other side. You will not hear anybody shouting, "Vote for whisky! Vote for whisky! Down prohibition!" That wouldn't sound nice at all. But, just the same, when the smoke of battle clears away I am afraid the "Drys" will find that this is a territory where the people got up before breakfast and the dogs bark at a stranger.

"Self-denial week" applies in quarters other than the Salvation Army. The morning DENIAL paper put in the most of week before last denying nearly everything it said the day before. The Governor denies any secrecy in the Kapa Exchange. It is just possible that governors may think that the transactions attending the swapping of a broken-handled jackknife for a bag of chipped mahoes is too highly elevated for the diminutive comprehension of a territorial population.

Mr. Dillingham denies having any business relations with Thayer, who went to the Philippines to buy up sugar land, and there is not an autist in town-but denies any credit for speed over four miles per hour. That's what they tell the Judge, but I heard one of them say the other day that he made an hour in fifty-nine minutes.

I attended court a day or so ago out of curiosity only. I had a certain amount of curiosity WILL OUT before I entered. After listening to the evidence in two cases my curiosity was much intensified, but not satisfied. It is truly wonderful what builders of statements some of the witnesses are. Some of the evidence given under "the truth, the whole truth, and nothing but the truth" was quite similar to the picture of the "Palace of Truth" on the drop curtain at the Opera House—so thin you might throw a watermelon through it any place.

I always thought a Judge had a snap and that Judge Woodruff was a chump to jump a job like he had, but they all have my sympathy now.

While the Siberia was in port a couple of tourists were SNOW IN taking in the sights of HONOLULU the city from the seat of one of the Rapid Transit cars. I sat directly behind them and was much interested in the comments they made. Suddenly one of them exclaimed, "Look, it is snowing. Let's get back to the steamer as soon as possible!" And they piled off the car. I am sorry they went away with the impression of a snow storm in Honolulu. It was not snowing at all. It was only the conductor punching out one of the Peek patent transfers for me.

Although I would talk Honolulu against any city in the CLEAN world for being extra in STREETS all around conditions as cities should be, still there is room for improvement.

I am informed by friends who have but recently returned from the mainland that there is a general crusade going on throughout the States to clean cities. In Philadelphia a women's club has been organized for the express purpose of street improvement. This club of women petitioned the municipal authorities for the right to take charge of one city block to keep it clean, as an example of what could be done to keep it clean. It is stated that that particular block soon became a rebuke to the rest of the city and caused a general improvement.

The throwing of old newspapers and bits of waste wrapping paper into the streets does more, perhaps, than anything else to give an untidy appearance to towns and cities. Let any one take a single glance over any thoroughfare through which he passes and the truth of this assertion will be apparent. The nuisance should be abolished. In foreign cities the person who throws a scrap of paper on the street is arrested and prosecuted.

The remedy for the trouble is so simple. The streets would be com-

paratively clean and could be easily kept so if people would only refrain from throwing papers and refuse into them. We clutter them up by a direct act and then regret that their appearance is disreputable. Why not stop casting anything at all into the streets? If only each one will do his part, the reform will be prompt and thorough.

Hurling from out the infinite reaches of space with its THAT glowing tail extending for COMET miles and miles behind it, Halley's comet is now blazing in the heavens. Seen only as a nebulous glow low in the east, when the dawn winds sweep across the heavens, it is fast coming near as a messenger of doom and potent of evil, according to the superstitions, and when its whirling tail hits the earth a report says that we shall be wiped out of existence of flung, more human storms, out into the infinite.

For the monad of the skies, who for centuries has swung upon his whirling course, now sweeping close to the earth, now whirling out among other worlds, is nearer now than at any time.

All that sounds picturesque, doesn't it? Sends little thrills of excitement through you at the thought of that sky monster that before the end of this month will loom above us visible to every one.

Heretofore I have not thrilled with a cent over the comet, but curiosity got the better of me; the other morning and after "cussing" the alarm clock I crawled out of bed.

I had read of comet parties stealing out in the hush of dawn to see the sky nomad from the hill tops, and I had heard of grave astronomers at Kaimuki watching through the long night hours, but somehow I had not gathered much of the comet enthusiasm.

After I had crawled out of bed I came very near crawling right back again, but the act seemed cowardly to me, and getting on my dignity and some clothes I wandered outside and started for the east side of the house, as that was the proper place to get a look at the sky wanderer. After some "trouble" I arrived at a proper point of vantage for an observation, but the east was full of clouds.

The "trouble" I encountered on my way from the west side of the house to the east side consisted of two garden faucets and the kid's Irish Mail. If the display to be seen later can at all stack up with what I saw through the running gear of that Irish Mail it will be worth while.

I made a few remarks after I had gained my room and am willing to repeat them for the benefit of posterity, but the stenographer who attempts the job will have to be familiar with the system used by the Recording Angel if he expects to get it all.

I am not going to try to find the comet any more. Let George do it.

ECZEMA CURED IN SIMPLE WAY

When you have a scratch on your hand you wash it out and cleanse it and then the skin cures itself.

The best skin specialists today are agreed that the only way to cure the skin is through the skin. For statistics show that nearly all eczema sufferers are perfectly healthy in all other ways except as to their skin. And if the eczema patients were really suffering from an internal malady, the entire body and not only the skin would be diseased.

You can prove immediately the relief of a true skin cure by using oil of wintergreen as compounded in D. D. D. Prescription. This liquid kills the disease germs, while toning up the healthy part of the skin.

We have now handled this meritorious and thoroughly scientific remedy for so long and have seen its reliable results so many times that we freely express our confidence.
